

R-6 molded fiberglass back
w/ foil vapor barrier

Panel available in steel

product description

This model is assembled in a two-part system: one is the ceiling diffuser itself with frame and blades extruded from 6063 alluminum alloy...the other is the panel into which the diffuser with its extruded frame is mounted. The extruded frame of the diffuser is fitted into the inner edge of the panel and crimped. The core is non-removable. The diffuser increases in 2" increments beginning with 6" x 6" through 18" x 18" as the largest available size. It is available in square configurations only. This model is painted either white or alluminum in color.
