EXTRACTORS

MODELS: EXR-3, EXR-B

SUSTAINABLE EXTRUDED ALUMINUM

Dimensions are in inches

EXR-3

Extractor with worm gear control.

EXR-B

Extractor with an operator arm.

DESCRIPTION:

1. Model EXR-3 is an extractor with worm gear control that is operated with a hand crank within the duct. The blades are 24-gauge galvanized steel, the base is 18-gauge, and the straps are 16-gauge.
2. Model EXR-B is identical to the EXR-3 with the exception that this unit has an operator arm that extends from the extractor and is manually set. This unit is operated from the inside of the duct.
