

RA-AG
1/2" x 1/2" x 1" Alum. Grid
90% free area

Model available for narrow T-bar ceiling – must have suffix "-NT" added to model number.

product description

The frame is 6063 extruded aluminum alloy with 200-R1 satin anodized finish. It has a typical wall thickness of .050".

Model RA-AG utilizes 1/2" x 1/2" x 1" mill-finish aluminum grid .025" thick.

The frame mounting holes are dimpled, allowing for a counter-sunk fastener head appearance.

An optional opposed blade damper is attached to the return grille with positive-locking spring clips and is screwdriver-operated through the face of the unit. It has injection-molded nylon bushings and the same extruded aluminum construction.

Suitable for ceiling, sidewall and T-bar applications.

Available in clear anodized, white or a variety of custom colors.
